

# SnapLine – AI ‘Context Engineered’ driven property underwriting.

## WHAT WE DO

### Streamline

Designed to automate the ingestion, enrichment & triage of complex broker submissions, SnapLine uses a context engineered agentic workflow to extract & structure key risk information.

### Strengthen

With integration of long-term memory, document history & real-time retrieval, it supports better decision-making & faster quote turnaround, while reducing manual errors.

## We'll supercharge your underwriters with Context Engineered AI; saving time.

**Snapline** is an advanced **AI underwriting platform** purpose-built for the property insurance sector, single & multi-location. New LOB's also being onboarded. Key features:

**Agentic Workflow:** Autonomous AI agents collaborate to assess, summarise & route risks efficiently.

**Context Engineering:** Combines state, memory & retrieval to provide accurate & consistent outputs.

**Multi-Format Ingestion:** Handles broker submissions in PDFs, Excels, DOCX, images & .eml attachments & many more.

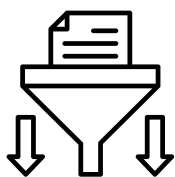

**Underwriting Taxonomy:** Classifies risks using a standardised framework to ensure precision & consistency.

**Audit Trail:** Tracks amendments, user input & confidence levels to ensure full transparency.

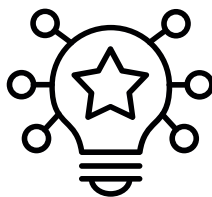

**Built on AWS:** Secure cloud-native architecture with full scalability & partner-ready integration.

**Blueprint Two:** As the market digitizes we will future proof our solutions to focus on data & standardisation.

**Business Impact** - ✓ Reduce manual processing time by up to 70% | ✓ Improve triage accuracy | ✓ Enhance risk visibility across portfolios.
